

## MARINE INSURANCE

### **Why use Clickcover for your Marine insurance?**

As a vital component of international trade, cargo insurance provides importers and exporters with cover against physical loss or damage to goods whilst in transit by land, sea and air.

We have access to a large team of underwriting, risk control, claims and customer service personnel providing insurance solutions to a diverse client base in this specialist field. Our product range is extensive and our policy wordings are comprehensive. Policies can be purchased on a single shipment or annual policy basis as required.

Coverage is tailored to individual policyholders' needs and may be extended to cover goods in storage during transit so that continuous protection is provided for goods throughout the distribution chain.

One of our Insurers provide an online solution which is helping to reduce the cost and the administrative burden of transacting cargo insurance. It handles all aspects of the cargo declaration and certification process and facilitates access to valuable real time risk management information such as limit profiles and trade patterns.
